WORKFORCE OBSERVATIONS FOR WISCONSIN BAY AREA COUNTIES

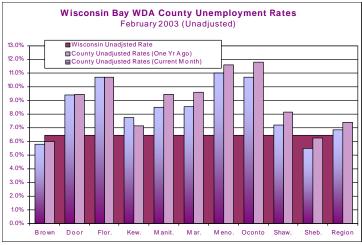

State of Wisconsin
Department of Workforce Development

March 2003

Unadjusted Unemployment Increases During February

easonally unadjusted rates increased 0.3 of a percentage point from January to 6.9 percent in Bay Workforce Delivery Area. Employment levels during the winter months are fre-

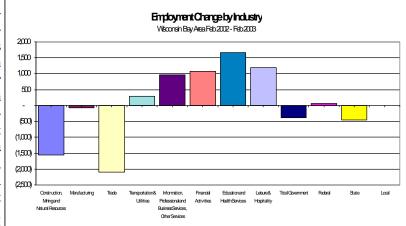

quently influenced by seasonal factors so the increase is not totally unexpected. The first half of January was relatively mild with some days up near the 50 degree mark. This was followed by temperatures at or below normal for the remainder of the month, and all of February. Along with seasonal factors, the area's economy

has also been influenced by the national economy. and the international situation with Iraq.

The months of January and February have the highest

level of unemployment during the calendar year. In February, nine of the area's ten counties had an their increase in monthly rate, with Marinette County remaining unchanged at On a 8.6 percent. more positive note, only one county had a higher unemployment than one year ago. The region remained

above the State of Wisconsin's unadjusted rate of 6.4 percent. The monthly rate in the region was 0.5 of a percentage below last February when it was 7.4.

Along with an increase in the region's unemployment rate, both the size of its labor force and the number of employed declined. The labor force declined 400 in February, while the number of workers employed

dropped by 1,300. Both employment and labor force levels remain well above last year's levels.

The number of jobs in the region declined 1,300 from

January. The largest declines were in the manufacturing, trade, and leisure and hospitality industries. Looking back to last February, the number of jobs in the area increased by 1,000.

Assistance sought from multi-location employers

Employers with operations in multiple locations (worksites) in Wisconsin who do not report the number of workers at

each location are requested to complete a Multiple Worksite Report (MWR). The MWR are sent to employers during the first quarter by the **Bureau of Workforce Information** and supplement the data that

> employers provide on the Unemployment Insurance Quarterly Contribution Report.

Similar to the unemployment report, the employment and wage data collected in this survey is confidential and used only for statistical and analytical studies, Unemployment Insurance Program purposes, and the

Dislocated Worker Program. Employers benefit because data can be used to assist business planners with new sites location, economic forecasting, and wage analysis.

For more information, or assistance on the MWR, contact Deborah Holt at 608,266.5321

(Continued on page 2)

Seasonally Adjusted Unemployment Rates

This was an increase of 0.2 of a percentage point from January. Last February the rate was 5.5 percent.

The seasonally adjusted unemployment rate for the Green Bay MSA declined 0.1 of a percentage point to 4.8 percent. This compares to 5.0 percent last February.

The nation's unemployment rate increased 0.1 of a percentage point to 5.8 percent. The rate for Wisconsin was down 0.1 of a percentage point to 5.3 percent.

The rate for the Sheboygan MSA was also at 4.8 percent. For add
